The world premiere of this non-narrative performance art piece features two nude men exploring not only physical nudity, but emotional nudity. Colors shoot out as energetic interplay of our deepest dreams and desires. Witness a live moving sculpture of bodies twisting and yearning to find resolution in the spirit of color.

Created using the Internal Landscapes© and Spirit of Color© methodology developed by Ollom Art's Artistic Director, John Ollom who is known for presenting works that ring with honesty and emotional truths.

Join us afterwards at the Butterfly Bar next to this living moving human sculpture.
